TOR Browser /Deep Web Interface and Analysis Software

Q&A

Q - I want to know exactly what type of information you are you looking to gather? This will help us knowing if our solution will solve your needs.

A - The Ogden Police Department seeks to locate criminal activity taking place on the Dark Web. We need to access to a mixture of social media, deep, and dark web data sources that are otherwise not searchable through most commercial and official APIs. Searchable content needs to be tagged and classified to indicate threats and criminal activity to aid in criminal and threat analysis. The platform should include Geofencing to allow searching by geographic area.

Data sources should include:

- Tor sites
- Endchan
- ZeroNet
- Gab
- I2P
- Mastodon
- OpenBazaar
- Raddle
- Telegram
- Reddit
- Discord
- Pastebin
- IRC
- DeepPaste
- 4chan
- Deep websites
- 8kun
