Public Safety Unmanned Aerial Systems (UAS) Purchase (RFB)

Addendum 1

Q&A

Question 1: You are requesting DJI Mavic 2 Enterprise Zoom batteries however there are 2 different models. One model has a self-heating function built in, and the 2nd one does not. Can you specify which do you want the part # provided is not an actual part number?

Please quote us for the built in self-heating function.

Question 2: You are requesting Part # DJI-CSKY-785 which is a DJI Crystal SKY 7.85 monitor. There are 2 versions of this monitor, one is called Hight Bright, one is called Ultra bright. Can you specify which do you do want? The part # provided is not an actual part number.

We would like the CrystalSky 7.85" Ultra Brightness.

Question 3: There are 2 lines asking for an Anti-Collision Strobe Light system with custom housing. All aircraft that you are requesting have these features either built into the aircraft and or have the accessories in the kit. Is there a specific additional kit you are looking to purchase? If so can you specify?

We just need strobes that will allow us to perform nighttime operations while still being FAA-compliant. If that is included, please disregard the two lines.

Question 4: You are requesting Part # DJI-ES-1914 – Enterprise shield mavic 2 enterprise dual – but this package automatically comes with the purchase of the aircraft. Do you want an additional Enterprise shield plan in addition to the one it comes with?

We would like just the one it comes with – we don't need additional warranties at this time.

Question 5: You are asking for 12 DJI-TB55 batteries – The aircraft comes with 2, do you want an additional 12 batteries as listed or a total of 10 including the 2 it comes with?

We will need 12 additional batteries.

Purchasing Division

Question 6: You are asking for Go Professional case inserts for the Mavic Enterprise but no Go Professional case for the M210. Can you confirm that we should not bid or include the Go Professional case for the M210 in the quote?
Please include a case for the M210.

Question 7: DJI-ES-1914 Enterprise shield Mavic 2 Enterprise dual basic is listed twice but as mentioned in question 4 the one you are purchasing is included in the kit for no extra cost. There is also no mention of a Enterprise shield warranty for the Zoom. Should we assume the one listed on page 2 is for the zoom and the description is a typo? Please clarify all enterprise warranties you are looking to purchase?

We need warranties for each of the aircraft. If included in the purchase of the aircraft, those Enterprise Shield Plans will suffice.

Additionally, we will need an itemized list broken down into separate line items. Also, we are seeking a training program that will provide insight regarding the administration of a drone program specifically for law enforcement, to be maintained by law enforcement but used by the rest of the city (i.e. zoning/planning, GIS teams). This administrative training is separate from, and in addition to, the pilot proficiency training and is primarily geared towards public safety and focuses on the laws and circumstances directed towards the public safety mission.

Question 7: The RFB states the need for a Anti-Collision Strobe Light System (White) with Custom Housing. The DJI Mavic has its own Anti Collision Strobe Light for the Mavic 2 Enterprise.

Is there a need to have ALL of the aircraft equipped with a strobe, or just a single/specific aircraft needs this piece of equipment.

All aircraft will need to be outfitted with an anti-collision strobe. If the DJI aircraft come with them, the provided strobes will suffice.
